

Abdul Haleem

Results-driven Full Stack Developer with hands-on experience in front-end and back-end development. Expertise in creating interactive, responsive web applications using ReactJS, Java, Spring Boot, and MySQL. Seeking a challenging developer role to leverage my technical skills and contribute to organizational success.

Work Experience

Full Stack Developer at Cloudsmaya Services Pvt. Ltd

October 2023 - Aug 2024

- Developed interactive and responsive UI components using ReactJS.
- Built APIs using Java Spring Boot, reducing response time by 20% and improving user experience.
- Handled server-side logic and integration with front-end elements.
- Optimized database schemas in MySQL, reducing query time by 30%.
- Collaborate with project managers to analyze progress, plan sprints, and implement new features, while leading the development team and providing technical mentorship.

Projects

LoomYarn.com - Web Application (<https://www.loomyarn.com>)

October 2023 - Aug 2024

- Developed responsive UI components with ReactJS for a smoother user experience.
- Built RESTful APIs with Java Spring Boot for efficient data handling and server-side logic.
- Optimized MySQL database queries to improve data retrieval speed.
- Worked closely with the team to plan features and implement solutions that met project goals.
- Provided technical support and guidance to junior developers on the project.
